

INDICADORES BIBLIOMETRICOS

Los indicadores bibliométricos se utilizan para clasificar las revistas científicas de acuerdo a su calidad e impacto, orientan sobre el valor científico de las mismas.

Factor de Impacto de una revista

El factor de impacto de una revista es la media de citas que reciben en un determinado año los documentos publicados en dicha revista durante los dos años anteriores y se calcula dividiendo este número de citas por el número de documentos citables publicados por la revista en los dos años previos. Qué se entiende por documentos citables? Los documentos citables según el ISI son los artículos, las notas y las revisiones.

Índice de Inmediatez

El índice de inmediatez es el cociente entre la cantidad de citas en un determinado año a artículos publicados en el mismo año y la cantidad de artículos publicados en el mismo lapso.

Vida media de las citas recibidas

La vida media de las citas recibidas es la mediana de la distribución de las citas por año de emisión. La mitad de las citas a una determinada revista son a artículos publicados dentro de la vida media de las citas.
