

Non-equilibrium Statistical Physics with Application to Disordered Systems

Caceres, Manuel Osvaldo

Table of contents (9 chapters)

- Elements of Probability Theory Pages 1-60
- Fluctuations Close to Thermodynamic Equilibrium Pages 61-82
- Elements of Stochastic Processes Pages 83-177
- Irreversibility and the Fokker–Planck Equation Pages 179-239
- Irreversibility and Linear Response Pages 241-272
- Introduction to Diffusive Transport Pages 273-334
- Diffusion in Disordered Media Pages 335-385
- Nonequilibrium Statistical Mechanics Pages 387-428
- Metastable and Unstable States Pages 429-471
